

Dirca palustris

Leatherwood

A very pretty woodland shrub, with an interesting, horizontal branching pattern. Small clusters of bell-shaped yellow flowers emerge in early spring before the leaves. Fall color is a clear yellow. Thrives in semi-shade and good soil. Can be difficult to transplant, but once it's established it's problem-free.

Suggested companions: sugar maple (*Acer saccharum*), beech (*Fagus grandifolia*), pagoda dogwood (*Cornus alternifolia*), spicebush (*Lindera benzoin*), blue cohosh (*Caulophyllum thalictroides*), merrybells (*Uvularia grandiflora*), yellow trout lily (*Erythronium americanum*).
